

FINAL PROGRAM

CIMAC  
CONGRESS 23

BUSAN, JUNE 12-16, 2023

# Meeting the Future of Combustion Engines

## 30th CIMAC WORLD CONGRESS

Combustion Engine Technology for Ship Propulsion | Power Generation | Rail Traction

**Denise Kurtulus**  
Vice President Global Marine  
Passionate Hiker

# HOW CAN SIGNIFICANT CO<sub>2</sub> REDUCTION BE ACHIEVED PROFITABLY?

The sustainable solutions we develop offer a variety of successful paths to net zero emissions.

Providing ever cleaner, safer and more competitive solutions is always on our mind – even when we're not at work.

Talk to Denise about our Greenhouse Gas Roadmap on [LinkedIn](#)

# Join us in Busan!

Usually every three years, the CIMAC World Congress and the accompanying exhibition is held in one of our member countries. But due to COVID-19, the congress had to be postponed from 2022 to 2023. It will now be held from June 12 to 16 in Busan.

The Congress is a unique opportunity to keep up to date with what is happening in the internal combustion engine industry and along the value chain, to talk to other professionals from all over the world, to stay in dialogue and to discuss the topics that interest us most or that are particularly pressing on our minds and to the industry.

South Korea will host the 30th edition of the Congress since the founding of the association back in 1951. This proud tradition proves how important and how indispensable this global meeting is. South Korea is hosting the CIMAC Congress for the first time. This choice has been wisely made. The country and its important shipbuilding industry have asserted themselves on the world market and have continuously occupied a leading position for a long time. We are very pleased to be hosted in Busan with its outstanding port: Its depth and low tidal differences have helped Busan become the largest container handling port in the country and the fifth largest in the world.

The 2023 Congress is taking place under special auspices. Our industry is facing enormous, perhaps historically unique challenges, so a holistic professional exchange along the value chain about the state of the art is imperative. A central focus of this year's Congress will lie on identifying the best and realistic ways for the industry to quickly reduce emissions, on addressing greenhouse gas emission targets, on the onset of digitalization in shipping, on developing alternative fuels, and on bringing more clarity to the discussion about future fuels in the industry - all in all challenges that require collaboration within the industry and beyond more than ever before. We look forward to your contribution and to seeing you at the 2023 CIMAC Congress in Busan, where the Congress will provide a perfect opportunity to meet manufacturers, component suppliers, shipyards, research professionals, contractors, customers, and colleagues from across the industry around the world.

Presentations, flanked by the exhibition, poster sessions and the traditional technical tour, will highlight the latest product and technology developments and the value they bring to customers. Strong focus will lie on scientific research that will form the basis for the next generation of technology solutions, and the needs of markets to ensure a sustainable, environmentally friendly and economically viable future will be addressed. In addition, the Congress with its outstanding program including new formats such as pecha kucha presentations will provide a unique opportunity to do business and build lasting networks. Panel discussions and keynote presentations will challenge us to broaden our perspectives.

Once again – Welcome!

**Marko Dekena**  
Vice-President Technical Program

**Jonas Åkerman**  
Vice-President Technical Program

# Welcome to Busan!

We are looking forward welcoming you to Busan, and we hope you will enjoy this wonderful city. Korea is an extremely modern country, but at the same time committed to its traditions. This is particularly evident in Busan, the country's second largest city.

The combination of old and new can be found here at every turn. Outstanding meeting facilities such as the BEXCO Convention Center, where the CIMAC Congress will be held, are just minutes from sandy beaches and historic mountain trails. Huge temple complexes that have endured for millennia are located amidst some of Asia's tallest residential skyscrapers. The city's natural features and rich history have enabled Busan to develop into a first-rate tourist city and established it as a hotspot for international conventions. Add to this the pleasant climate: Busan has four distinct seasons, but it is never too hot nor too cold.

We promise, there is a lot to see and do in Busan - be sure to check out the optional tours in the program and take advantage of what the city has to offer.

**On behalf of the National Member Association of Korea – KOFCE (Korea Federation of Combustion Engines), we hope you enjoy your visit to Busan!**

**Kwang Heon An**  
Congress President

**Ji Hyoub Cha**  
NMA Korea Secretary General

# Welcome to the CIMAC Congress 2023 Together for a Common Future!

The International Council on Combustion Engines-CIMAC-cordially invites you to the 30th CIMAC Congress from 12 to 16 June 2023 in Busan, Korea.

The internal combustion engine has promoted industrial development and brought great convenience to people's life since its invention. Large combustion engines are essential to the global economy, particularly in maritime transportation, the energy and the rail sector. The years since the last CIMAC Congress have been very extraordinary and demanding. Our industry and our community have weathered this ordeal.

Today's CIMAC is a vigorous and attractive organization, it has become the leading global association of our industry. CIMAC provides a global platform for discussion through a range of events, while the CIMAC Congress is one of the most important international events. 72 years ago, when the first CIMAC Congress took place in Paris in 1951, industry pioneers came together with professionals from institutes and universities, to generate new ideas and discuss the future development of combustion engines. This tradition has been kept throughout the last seven decades. This year, the CIMAC Congress once again brings together the large engine industry's stakeholders. The leading experts from all over the world are actively participating in our congress and adding their new knowledge and contributions to our broad field.

Our call for papers met with a gratifyingly broad response. We received more than 500 proposals for abstracts competing for over 250 presentations at the CIMAC Congress. Social events and technical tours will further support the excellent networking possibilities in Busan. More than 800 experts from all parts of the world came to Vancouver in 2019. We are confident we will welcome a similarly high number of participants in Busan.

Today is a time of grave challenges, but also a time of great hope. I believe that the CIMAC Congress 2023 will be a grand gathering where we can see the competition of ideas, enlightenment of wisdom, building of consensus and facilitation of development, and will surely lead the development of global ICE technology and industry towards a new direction.

CIMAC sincerely invites you to the 30th CIMAC Congress and we are looking forward to meeting you in Busan.

**Donghan Jin**  
President of CIMAC

Since 1943, NICO Precision Co., Inc. ("NIP") has been designing and manufacturing Fuel Injection Equipment ("FIE") of 4-stroke diesel engines for marine and land-based power generator, and supplying them for various major engine manufacturers in Japan and overseas.

Our continuous challenge for high-precision machining has led to our current superiority in performance, quality, and durability, which in turn has led to a high reputation among our customers.

Specializing in fuel injection system components, NIP will continue to provide products with higher precision and reliability, as well as new electronically controlled fuel injection systems and pursue services throughout their life cycle.

**For much better technology  
For much better the world**

**NICO Precision Co.,Inc.**  
**ニコ精密機株式会社**

**We have infinit possibilities to change the world with you**

## CONGRESS OVERVIEW

Day	Time	Activities
Sunday June 11, 2023	14:00 – 18:00	Congress Information Desk
	14:00 – 18:00	Speakers' Preparation (Room 106)
Monday June 12, 2023	<b>10:00 – 11:30</b>	<b>Opening Ceremony (Auditorium)</b>
	10:00 – 17:40	Exhibition & Poster Sessions
	12:00 – 18:00	Speakers' Preparation (Room 206)
	12:40 – 13:40	Lunch
	<b>13:40 – 15:00</b>	<b>Technical Sessions</b>
	15:10 – 15:40	Poster presentation by the author
	15:00 – 16:00	Coffee Break
	<b>16:00 – 17:40</b>	<b>Technical Sessions</b>
	<b>18:30</b>	<b>Welcome Reception at Paradise Hotel Busan</b>
	Tuesday June 13, 2023	08:00 – 18:00
09:00 – 17:40		Exhibition & Poster Sessions
<b>09:00 – 10:40</b>		<b>Technical Sessions</b>
10:40 – 11:20		Coffee Break
<b>11:20 – 12:40</b>		<b>Technical Sessions</b>
11:20 – 12:40		Pecha Kucha Presentations
12:40 – 13:40		Lunch
<b>13:40 – 15:00</b>		<b>Technical Sessions</b>
<b>13:40 – 15:00</b>		<b>PANEL Digitalization</b>
15:10 – 15:40		Poster presentation by the author
15:00 – 16:00		Coffee Break
<b>16:00 – 17:40</b>		<b>Technical Sessions</b>
<b>18:30</b>		<b>Accelleron Evening</b>
Wednesday June 14, 2023	08:00 – 18:00	Speakers' Preparation (Room 106)
	09:00 – 17:40	Exhibition & Poster Sessions
	<b>09:00 – 10:40</b>	<b>Technical Sessions</b>
	10:40 – 11:20	Coffee Break
	<b>11:20 – 12:40</b>	<b>Technical Sessions</b>
	11:20 – 12:40	Pecha Kucha Presentations
	12:40 – 13:40	Lunch
	<b>13:40 – 15:00</b>	<b>PANEL Defossilization COLLIN TRUST Keynote</b>
	15:00 – 16:00	Coffee Break
	<b>16:00 – 17:40</b>	<b>Technical Sessions</b>
Thursday June 15, 2023	08:00 – 16:00	Speakers' Preparation (Room 106)
	09:00 – 17:40	Exhibition & Poster Sessions
	<b>09:00 – 10:40</b>	<b>Technical Sessions</b>
	10:40 – 11:20	Coffee Break
	<b>11:20 – 12:40</b>	<b>Technical Sessions</b>
	12:40 – 13:40	Lunch
	<b>13:40 – 15:20</b>	<b>Technical Sessions</b>
	15:30 – 16:00	Poster presentation by the author
	15:20 – 16:00	Coffee Break
	<b>16:00 – 17:00</b>	<b>FINAL PANEL</b>
Friday June 16, 2023	<b>07:30 – 13:30</b>	<b>Technical Tours (Half day)</b>

Optional Tours  
June 12 - 15, 2023

## TOPICS AND SESSIONS

- Digitalization and Connectivity**
  - Leveraging Vessel Connectivity
  - Process Optimization and Predictive Maintenance
- System Integration and Hybridization**
  - Ship Hybrid Propulsion
  - Hybrid System Engineering
- Electrification and Fuel Cells Development**
  - Marine Fuel Cell Applications
- Controls, Automation, Measurement & Monitoring**
  - Controls and Sensing
  - Monitoring and Fault Diagnostics
- Emission Reduction Technologies - Exhaust Gas Aftertreatment Solutions**
  - Scrubbers
  - Particle Filtration
  - SCR Technology
  - GHG Reduction (ammonia combustion & slip reduction)
- Emission Reduction Technologies - Engine Measures & Combustion Development**
  - GHG Reduction (H2 combustion & transition outlook)
  - PM/BC Reduction
  - Engine Measures
- Fuels - Conventional Fuels**
  - Test methodologies to predict fuel performance
  - Fuel development
- Fuels - Alternative & New Fuels**
  - Development aspects for using ammonia/methanol as a fuel
  - Future Fuel systems aspects
  - Biofuels / Future Fuels storage, supply and handling
- Lubricants**
  - Zero-carbon Fuel Lubricants
  - Gas Engine Lubricants
- New Engine Developments – Diesel**
  - 2-Stroke Engines
  - 4-Stroke Diesel Engines (1)
  - 4-Stroke Diesel Engines (2)
- New Engine Developments - Gas**
  - New Gas Engine Development
  - New Gas Engine Technology
- New Engine Developments - Dual Fuel**
  - dual fuel engines
- New Engine Developments - Alternative Fuels & other New Engine Concepts**
  - Methanol Engine Technology
  - Hydrogen and Ammonia Engine Technology
  - Alternative Fuel Concepts & Platforms
- Engine Component Developments - Fuel Injection & Gas Admission**
  - "LIQUID" or Conventional Diesel
  - "GAS" or Alternative/New Fuels
- Engine Component Developments – Components**
  - Advanced Component Integration
  - Auxiliary Equipment Systems
- Engine Component Developments - Tribology**
  - Bearings
  - Piston, Rings & Liner
- Engine Component Developments - Turbochargers & Air/Exhaust Management**
  - Next Generation Turbochargers & Intake Systems
  - Air-/Exhaust Management for Alternative Fuels
- Basic Research & Advanced Engineering - New Concepts**
  - Basic Research & Advanced Engineering - New Concepts
- Basic Research & Advanced Engineering - Simulation Technologies**
  - Engine Thermodynamics 1
  - Engine Thermodynamics 2
- Basic Research & Advanced Engineering - Mechanics, Materials Research**
  - Mechanics and Materials
- Basic Research & Advanced Engineering - Visualizations**
  - Future Fuel Spray and Combustion
  - Engine System Thermodynamics & Visualization

Posters are on display all day, the author's presentation time is shown in the program.  
Note: Congress Information Desk will be open from Monday to Thursday from 08:00 - 18:00.

# Monday - June 12, 2023

13:40 – 15:00

Accelleron (R205)	INNIO (R104-110)	OMT (R101-103)	Robert Bosch (R201-202)
<p><b>21 Basic Research &amp; Advanced Engineering - Visualizations</b></p> <p>21-4 Future Fuel Spray and Combustion</p> <p>Chair: Long Liu (Harbin Engineering University)</p> <p><b>362</b> Characterization of future fuels using an optically accessible rapid compression machine Gerhard Pirker, LEC GmbH</p> <p><b>416</b> Optical experiments on ammonia combustion in spark-ignition engines with enhanced turbulence Jiaying Pan, Tianjin University</p> <p><b>620</b> Investigation of Post-injections for Emission Reduction of Diesel-piloted Ammonia Spray Combustion Valentin Scharl, Technical University of Munich, Chair of Thermodynamics</p> <p><b>501</b> Investigation of the Spray Characteristics under Conditions of Marine Diesel Engine using Image Processing Technique chen an, harbin engineering university</p>	<p><b>5 Emission Reduction Technologies - Exhaust Gas Aftertreatment Solutions</b></p> <p>5-1 Scrubbers &amp; CCS</p> <p>Chair: Kati Lehtoranta (VTT Technical)</p> <p><b>463</b> Investigations on combined scrubbing &amp; particle filtration technologies for maritime applications Uwe Etzien, University of Rostock - Chair of Piston Machines and Internal Combustion Engines</p> <p><b>182</b> Effects of Membrane filtration on the emission load of EGCS water from various fuels Dennis Fischer, BOLL &amp; KIRCH Filterbau GmbH</p> <p><b>545</b> The bench test research of Hige-based Marine exhaust gas cleaning system Shien Tu, Shanghai Marine Diesel Engine Research Institution</p> <p><b>379</b> Experimental study on the performance of an impinging scrubber Wenbo Zhang, China Shipbuilding Power Engineering Institute Co., Ltd</p>	<p><b>2 System Integration &amp; Hybridization</b></p> <p>2-1 Ship Hybrid Propulsion</p> <p>Chair: Hinrich Mohr (GasKraft Engineering)</p> <p><b>651</b> Optimization of Complex Energy Systems as an Enabler for Sustainable Shipping Solutions Bernhard Thaler, Large Engines Competence Center Graz</p> <p><b>419</b> EEDI Amendments using Ship Operational Profile in order to avoid Too Low Engine Reserve Power Congbiao Sui, Harbin Engineering University</p> <p><b>090</b> Z-PELLER electrification and optimization for decarbonization Yota Harada, IHI POWER SYSTEMS Co., Ltd.</p> <p><b>328</b> Development of a Free-Running Model Test Methodology for Evaluation of a Full-Scale Ship Propulsion OLEKSIY BONDARENKO, National Maritime Research Institute of Japan</p>	<p><b>11 New Engine Developments - Gas</b></p> <p>11-1 New Gas Engine Development</p> <p>Chair: Stephan Laiminger (Innio Jenbacher)</p> <p><b>017</b> Further NOx-thermal efficiency trade-off improvement with lean pre-chamber Yoshinori Kaji, DAIHATSU DIESEL MFG.CO.,LTD.</p> <p><b>091</b> Development of a low-speed four-stroke gas engine Satoru Higashikawa, The Hanshin Diesel Works, Ltd.</p> <p><b>415</b> Development of the next Generation Gas Engine with Increased Efficiency and Reduced Emissions Francisco Lopez Gutierrez, Innio Jenbacher GmbH</p> <p><b>448</b> Guascor Energy's new E-Series lean-burn gas engine – First field experiences Iñaki Iruretagoyena, Guascor Energy</p>

15:00 - 16:00 Coffee Break

# Monday - June 12, 2023

16:00 – 17:40

18:30 Welcome Reception at Paradise Hotel Busan

# Monday - June 12, 2023

15:10 – 15:40

Poster exhibition

25 Poster presentation by the author

- 003** Research of a China II-compliant marine diesel engine using two-stage turbocharging and EGR system  
Xiannan Li, Shanghai Marine Diesel Engine Reserch Institute

---

- 011** The corrosion behavior of steels in contact with metal doped biodiesel-diesel blends  
Katriina Sirviö, University of Vaasa

---

- 026** Miller cycle combined with EGR on the transient response performance of turbocharged diesel engine  
Zhilong Hu, Shanghai Marine Equipment Research Institute

---

- 150** True Worth Index represents the real price of the fuels purchased  
Ganesh Natarajan, The Viswa Group

---

- 168** Study on Cavitation Characteristics of Common Rail Injector Control Valve  
Hanwen Zhang, Harbin Engineering University

---

- 194** Analysis of gaseous emission and SFOC characteristic with SAC coolant temp. for two-stroke engine  
Sanghoon Kim, Korean Register

---

- 197** Effects of in-cylinder flow on natural gas mixing and combustion process in a dual-fuel engine  
Menghao Ma, Tianjin University

---

- 209** Modern sensor signals in networks  
Andreas Buchholz, Dr. E. Horn. GmbH & Co. KG

---

- 211** Influence of resonant intake system on cylinder consistency of marine high turbocharged diesel engin  
yang shuqiao, 711 Research Institute of China Shipbuilding Corporation

---

- 225** Collaborative optimization of EGR and Miller cycle of two-stage turbocharged marine diesel engine  
Ziqiang Chen, Shanghai Jiao Tong University

---

- 276** The Influence of Dual Electric Turbo Compound System on the Performance of Marine Diesel Engine  
Rui Liu, Shanghai Jiao Tong University, Shanghai Marine Diesel Engine Research Institute

---

- 301** High-power power electronic converter for Electrification of ship power system  
Xuan Yang, Shanghai Marine Diesel Engine Research Institute

---

- 654** Development of High Performance Stationary GEO and Establishing Its Long Drain Capability  
YOGESH KUMAR SHARMA, Indian Oil Corporation Ltd

---

- 369** Reduction of CO2 emissions in shipping through use of drop-in fuel components from bio-based waste  
Fanny Langschwager, Rostock University

Posters are on display all day, the author's presentation time is shown in the program.

# Tuesday - June 13, 2023

09:00 – 10:40

Accelleron (R205)

INNIO (R104-110)

OMT (R101-103)

Robert Bosch (R201-202)

**13** New Engine Developments - Alternative Fuels & Other New Engine Concepts

**5** Emission Reduction Technologies - Exhaust Gas Aftertreatment Solutions

**1** Digitalization & Connectivity

**12** New Engine Developments - Dual Fuel

13-2 New concepts hydrogen and ammonia engine technology

5-2 Particle filtration

1-1 Leveraging Vessel Connectivity

12-1 dual fuel engines

Chair: Daniel Chatterjee (Rolls-Royce Power Systems)

Chair: Stefano Ghetti (FEV GmbH)

Chair: Eero Lehtovaara (ABB Marine and Ports)

Chair: Dominik Schneider (Winterthur Gas & Diesel)

**203** ABC completes the upgrade of its DZ-engines into hydrogen dual fuel and spark ignition  
Luc Mattheeuws, Anglo Belgian Corporation NV

**549** DPF+SCR ultra low emission solution for medium speed diesel engines  
Daniel Peitz, HUG Engineering

**548** The Path towards Autonomous Shipping from the Perspective of the Propulsion System  
Peter Krähenbühl, Winterthur Gas & Diesel Ltd.

**146** MAN ES 49/60DF - Maximum performance from the modular system  
Ingo Wilke, MAN Energy Solutions

**231** Safe and efficient engine operation with Ammonia  
Kaj Portin, Wärtsilä

**637** Simulation based layout of a highly efficient aftertreatment system for a large diesel engine  
Thomas Kammerdiener, AVL List GmbH

**148** Implementing Fleet Digitalization: Systems, applications and lessons learned.  
Nikolaos Kyrtatos, Propulsion Analytics

**292** Development of Marine Dual Fuel Engine (EY26DF)  
Nobuyuki Higa, YANMAR POWER TECHNOLOGY CO., LTD.

**606** Widening the operation limits of a SI engine running on neat ammonia  
Mads Carsten Jespersen, Technical University of Denmark

**555** Reducing particle emissions from marine engines – fuel choices and technology pathways  
Kati Lehtoranta, VTT Technical Research Centre of Finland

**570** WiDE – an example on how digitalization creates value for ship operators  
Rudolf Holtbecker, Winterthur Gas & Diesel

**100** Significant performance improvements by using a low-pressure EGR system for the new X-DF2.0  
Fridolin Unfug, Winterthur Gas & Diesel

**667** Decarbonization of high-power systems: ammonia-hydrogen and ammonia-diesel combustion in HS engines  
Nicole Wermuth, LEC GmbH

**577** Emissions Prediction and Control of Marine Diesel Engine Based on Real-Time Combustion Analysis  
Ziqiang Chen, Shanghai Jiao Tong University

**647** Technological challenges and solutions for the 2030/2050 Chemical Parcel Tanker  
Jose Gonzalez, Stolt Tankers

**187** Service experience on dual fuel MAN B&W two-stroke engines in relation to cylinder condition  
Jesper Mark Pedersen, MAN Energy Solutions

**589** Developing the MAN B&W dual fuel ammonia engine  
Stefan Mayer, MAN Energy Solutions

**Impuls Discussion**  
Black Carbon IMO Update

**527** MAN-ES Automation Features on Demand  
Casper Olesen, MAN Energy Solutions

**514** WinGD X92DF engine service experience  
Konrad Räss, Winterthur Gas & Diesel

## Collin Trust sponsored Keynote Speech Perspectives on powering shipping through sustainable energy

As an expert in sustainable energy and transportation, Mr. Tunér will share his insights on how global shipping can contribute to a better world through the use of sustainable energy sources.

Global shipping plays a crucial role in energy-efficient transportation, but its current dependence on fossil fuels also contributes significantly to negative impacts on health, environment, and climate. With more than 5 billion tons of oil consumed every year, reducing the negative impact from the use of fossil fuels is an enormous task. Sustainable energy options for shipping are crucial, and Mr. Tunér will discuss how these options can be used to maximize impact with the available natural resources at the lowest cost.

During his presentation, Mr. Tunér will provide insights into the different energy sources and their potential availability, climate impact, functionality, and costs. He will also discuss why using several of these energy sources in parallel is advantageous. His speech will put the sustainable energy options in context by the scales of the challenges and the opportunities.

### About Collin Trust

The Collin trust was established in the 1990's, originally in the UK, and its purpose is the handling of a financial non-profit donation made by the Swedish late Prof. Lars Th. Collin (1925 – 2013), Gothenburg. The Trust organizes and sponsors Collin Trust Lectures, to foster education of the concerned public. This lecture is to be delivered at an international reputation on contemporary environmental issues. To present his/her own view, or an organization's view on important developments in the field of energy/energy conservation and/or related matters.

**Dr. Martin Tunér**  
Martin Tunér Ph. D.  
Assistant Dean for Doctoral Education  
International Advisor  
Professor, Combustion Engines  
Faculty of Engineering, LTH  
Lund University

Dr. Martin Tunér is full Professor at the Department of Energy Sciences at Lund University and holds a position as Vice-Dean of the Faculty of Engineering at Lund University.

The keynote will be followed by the „Decarbonization Panel“. Experts from the industry will take up and discuss topics from his presentation together with Dr. Tunér.

## Reimagining Motion

### For a greener, safer, better world of mobility.

We are driven by a passion to examine the science, mechanics and philosophy of movement. By using all our imagination, creativity and pioneering spirit, we create a world that is climate neutral and one that makes safe, comfortable, green mobility a reality for everyone.

Some will call it a distant dream.  
We call it **Reimagining Motion**.

Posters are on display all day, the author's presentation time is shown in the program.

## OPTIONAL TOURS JUNE 12 - 15, 2023

WEDNESDAY 14 JUNE 2023

### GYEONGJU SHILLA DYNASTY (Full Day / Activity Level: Moderate)

**Price: \$ 130 per person**

#### Description

Excursion out of Busan to visit Gyeongju, the ancient capital of Shilla now known as the “open-air museum” for being home of several Unesco Heritage sites of Korea.

The royal tombs at the Tumuli Park date back to the Shilla Dynasty (600-900 AD). Artifacts found in the graves show a remarkable technological and cultural achievements. The Cheomseongdae is the oldest existing astronomical observatory in Asia. The 362 stones used to build the Cheomseongdae represent the 362 days in the lunar calendar. The Anapji Pond is an artificial pond constructed for the royal family for leisure and study.

Inclusive: Private bus / English Guide / Admission fees / Lunch

#### Program

- 09:00 Departure BEXCO
- 10:30 Tumuli Park & Grave of General Kim Yusin  
Walk to Cheomseongdae Astronomical Observatory & Anapji Royal Pond
- 12:00 Gyeongju National Museum
- 13:00 Lunch & Free time in Hwangnamdong District / Hwangnidan-Gil  
Traditional village tour with rooftop cafés, restaurants, and tiny shops
- 15:00 Woljeong Bridge
- 17:00 Arrive at BEXCO, end of tour.

## OPTIONAL TOURS JUNE 12 - 15, 2023

THURSDAY 15 JUNE 2023

### Option 1: BUSAN ANCIENT WALL HIKING TRAIL (Full Day / Activity Level: Active)

**Price: \$ 80 per person**

#### Description

The century old Geumjeongsan Defense Wall stretches over several mountain ridges along the city of Busan. From the natural spring of Heoshimjeong one can take a cable car to the Defense Wall and make a wonderful hike for several hours along this wall. On the way stops can be made at the South-, East- and North Gate. The city view is spectacular. The hike ends at the Beomeosa Temple.

**Preparation:** Good physical condition required, good quality hiking shoes (highest point approximately 800 meters), sporty clothing, sun cream, 3-4 bottles of water and energy snacks. Lunch boxes are prepared by the guide. In case of rain or other adverse weather conditions, the tour will be cancelled or postponed.

**Inclusive:** Private bus / English Guide / Admission fees / Lunch package

#### Program

- 09:00 Departure BEXCO
- 10:00 Cable Car at the Geumjeong Park
- 10:30 Hiking via East Gate to the North Gate (highest point 800 meter)  
Descending to the Beomeosa Temple
- 14:30 Arrival at the Beomeosa Temple  
Free time at Beomeosa Temple
- 16:00 Arrive at BEXCO, end of tour

### Option 2 BUSAN SEASHORE TEMPLE TOUR (Half Day Morning Tour / Activity Level: Easy)

**Price: \$ 80 per person**

#### Description

The Haedong Yonggungsa Temple dates back to 1376 during the Goryo Dynasty. While most temples are tucked away high in the mountains, this temple was built along the shoreline. An enormous Buddha Statue on top of the temple complex is overlooking the amazing coastline. A special site at the temple are the 108 stairs and stone lanterns lining the rocky landscape. After going down the 108 steps one can enjoy the calming sounds of waves, and view the majestic sunrise.

**Inclusive:** Private bus / English Guide / Admission fees

#### Program

- 09:00 Departure BEXCO
- 09:30 Dalmaji-gil Road
- 11:00 Haedong Yonggungsa Temple
- 14:00 Arrive at BEXCO, end of tour

FRIDAY JUNE 16, 2023

## Technical Tour 1: Hyundai Heavy Industries, Ulsan

**Price: \$ 120 per person**

### Description

Since its foundation in 1972, Hyundai Heavy Industries turned a small fishing village into the busiest place in Korea. Hyundai Heavy Industries is leading the global shipbuilding industry with a wide range of product lineup that offers any type of ship desired by customers.

### Program

- 07:30 Departure from Busan, start of tour
- 09:00 Course A - Culture Center: History & Introduction
- 09:45 Course B - Culture Center 1F: Visit Exhibition Hall
- 10:20 Course C - Yard Tour (move from Cultural center to Engine factory)
- 11:20 Course D - Engine Factory Tour + Yard Tour (move from Engine factory to Cultural Center)
- 11:30 Pickup Lunch & Gift
- 13:30 Busan arrival and end of tour

FRIDAY JUNE 16, 2023

## Technical Tour 2: Korea Maritime and Ocean University

**Price: \$ 120 per person**

### Description

Based on the Jinhae Marine Officer School established in 1919, the Korea Maritime and Ocean University (KMOU) was opened in 1945 to pursue the goal of strengthening the country through the ocean. Since then, it has been producing experts in the maritime field, including the shipping industry, based on the noble educational philosophy of truth-finding, cultural creation, and character development, through which it has contributed to the development of the nation and society.

While its past history focused on the development of KMOU as Korea's only specialized maritime university, its future is to lead the world's oceans with the vision of becoming the world's best global maritime university.

### Program

- 08:30 Departure from Busan „BEXCO“ Start of tour
- 09:20 Course A – Training Ship (“HANBADA” or “HANNARA)
- 11:00 Course B – Greenship Technology Research & Test Center, Marine Simulation Center
- 12:30 Pickup Lunch & Gift
- 13:30 BEXCO arrival End of tour

FRIDAY JUNE 16, 2023

## Technical Tour 3: Korea Marine Equipment Research Institute

**Price: \$ 120 per person**

### Description

KOMERI is a specialised production technology research institute established in 2001 by the Industrial Technology Innovation Promotion Act under the Ministry of Trade, Industry and Energy with its aim to contribute to marine and offshore industries through comprehensive support including technical development and test certification of marine equipment.

KOMERI contributes to improving national competitiveness in shipbuilding and marine industry through preemptive technical development and constructing the foundation of test certification as well as international standardisation activities in new leading business such as environmental friendly ship, Maritime Autonomous Surface Ship(MASS), hydrogen fueled ship and new renewable energy. Also, in response to diversification of foreign markets, KOMERI is also making efforts in technical cooperation projects with global regions.

### Program

- 09:00 Departure from Busan „BEXCO“ Start of tour
- 10:00 Course A – Advanced-Green Technology Center
- 11:00 Course B – Fuel Gas Technology Center
- 12:00 Pickup Lunch & Gift
- 13:20 Busan arrival End of tour

None of the tours are adventurous or dangerous, and should be fully covered by your travel insurance. No special preparations needed for Easy and Moderate tours. For Active tours adequate preparation necessary.

**Easy:** These tours are at a leisurely pace which involves minimal physical activity. Standing and walking for short periods of time, mainly when visiting a Buddhist temple, museum or market.

**Moderate:** Long touring day with moderate physical activity. Standing and walking for extended periods of time, mainly at Buddhist temple and natural sightseeing spots.

**Active:** Tour with main active element, such as hiking or biking. Walking over uneven and mountainous terrain, biking with moderate elevations. The participant should be physically fit and comfortable to walk 5-10 km. Adequate preparation according to specified instruction per tour required: suitable shoes, clothing, sunscreen, snacks and drinks.

# MAIN SPONSORS

## Platinum Sponsor

We thank our Platinum Sponsor of the 30th CIMAC World Congress for the extraordinary support!

### Accelleron

Turbo Systems Switzerland Ltd  
5401 Baden, Switzerland

Accelleron is a global leader in turbocharging technologies and optimization solutions for 0.5 to 80+ MW engines, helping to provide sustainable, efficient and reliable power to the marine, energy, rail, and off-highway sectors. Through its innovative product offerings and research leadership, the company accelerates the decarbonization of the industries it operates in. Accelleron has an installed base of approximately 180,000 turbochargers and a network of more than 100 service stations across 50 countries worldwide.

**Busan the city of international conventions - the perfect place for any event!**

Korea is one of the most advanced nations in the world, yet it is also a country steeped in historically rich tradition. In Busan, this combination of the old and the new abounds at every turn. Firstclass convention facilities sit minutes from sandy beaches and historic mountain trails. Serene, thousand-year old temple sites are nestled among some of the tallest residential skyscrapers in Asia.

## Busan

Busan is Korea's representative tourist city with over 3 million foreign visitors a year. From the Haeundae Beach to the beautiful natural environment, visitors can enjoy all four seasons. It provides a variety of marine tour programs, shopping experiences and other cultural activities. These have all combined to make Busan a world class tourist city for lodging and relaxation.

**Population:** 3.429 million

**Languages Spoken:** Korean is the national and official language in Busan. The language is drastically different from western languages. In addition to the native language, most people below 40 years of age speak English frequently. One of the most prominent minority languages in South Korea is Chinese, which is spoken by over 1.2 million residents.

**Climate:** Busan is characterized by the oceanic climate with warm summers and mild winters. In winter temperatures can drop below the freezing point at night. Rainy season is from April until September. Busan has a cooler version of a humid subtropical climate. Extremely high or low temperatures are rare. Busan and the nearby area have the least amount of snow compared to other regions of Korea due to its location.

**Time Zone:** Busan is in the Korean Standard Time Zone.

**Money:** The Korean currency is Korean Won (KRW). \$ 1 = KRW 1350. Upon your arrival at the airport in Korea you can exchange cash money to Korean won at any bank at Incheon Airport – or debit card out of the ATM. You can use your debit card if it shows the Cirrus- or Maestro-logo. Credit cards (VISA or MasterCard) are widely used.

**Electricity:** Korea has an electric voltage capacity of 220 volts. Adapters are necessary in case of variation to the European standard 2-pin plugs.

**Phone & Internet:** Wifi is widely available. If you want to have continuous access without using roaming, you can either rent a phone, sim card or Pocket Wifi. These items are for rental and can be picked up upon arrival at the Incheon Airport & Gimpo Airport.

For more information about Busan please visit: [Busan Tourism](#)

## Traveling to Busan

### Travel preparation

Please be aware that you have to register online for K-ETA (Korea Travel Authorization) <https://www.k-eta.go.kr/portal/apply/index.do> before travelling to Korea! You must complete your K-ETA application at least 24 hours prior to boarding your flight.

### Accessibility

South Korea is extremely well-connected by land, air and sea, with a high density of airports, train/subway stations and bus terminals all over the country. Almost all stations are meticulously clean and safe, the schedules frequent and punctual, and rates reasonable. For subway, bus and taxi, the most convenient is to purchase a T-Money Card at one of the numerous convenient stores.

### Domestic transportation

- **Domestic flights:** South-Korea has a convenient network of domestic airport that cover the entire country. The main domestic destinations are Seoul, Busan, Daegu, Gwangju and Jeju Island.

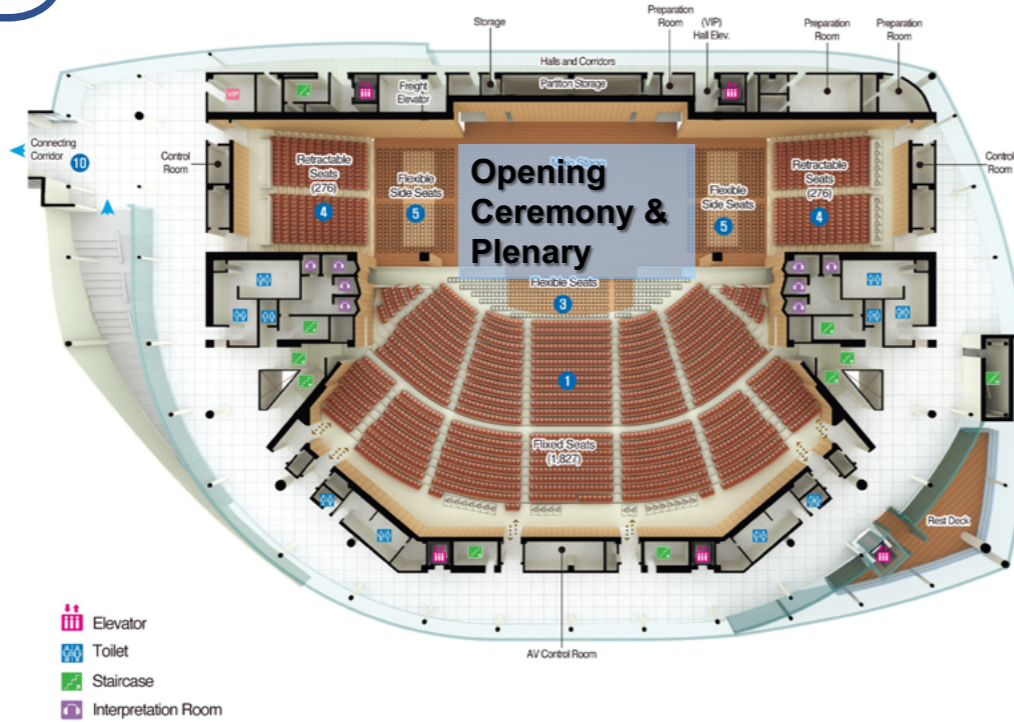

- **Train:** South Korea is conveniently connected by high speed train between all major cities on the mainland: Seoul, Daejeon, Daegu, Gwangju, Yeosu, Busan. Commuter trains ('Mugunghwa) still run and stop at smaller towns and villages. Payment by purchase of separate tickets.
- **Subway:** One of the best in the world and by far the most convenient way to transfer within the city. Seoul, Busan, Daegu and Gwangju offers state-of-the-art modern subway, with clear signage in Chinese, English and Japanese. The subway lines cross city borders and connect suburbs and nearby towns. Payment by T-Money card or purchase of separate tickets.
- **Taxi:** Uber is not the common taxi service, instead the Koreans use Kakao Taxi. The app is easy to download and convenient to use. Alternatively, the hotel staff can help you reserve a taxi, or you can stop a taxi on the road. Payment by T-Money card, credit card or cash.
- **Car rental:** Koreans drive on the right side. Driving in the big cities of Seoul and Busan is comparable with driving in Rome or Paris, so caution is advised. Car-rentals can be arranged in South Korea.

# ACCOMMODATION

## 1 CENTUM PREMIER HOTEL 4 \*

The finest business hotel within walking distance from BEXCO, and only 10 minutes drive to the famous Haeundae Beach. Located in a quiet area in the evening, and with an excellent restaurant inside the hotel. The hotel provides clean and cozy guest rooms and various facilities to ensure the best service and satisfaction for all guests.

**This hotel is fully booked**

## 3 THE WESTIN JOSUN Busan 5 \*

The Westin Josun Busan offers luxury along the famous Haeundae Beach with true 5-star service. It definitely has one of the best city- and sea views of Busan. It is 15 minutes drive to BEXCO Convention Center.

**Info & booking:** <https://zurl.co/9wJJ>

## 2 RAMADA ENCORE BY WYNDHAM Busan Haeundae 4 \*

RAMADA ENCORE BY WYNDHAM Haeundae has been opened in 2017 and is 500 meters away from the famous Haeundae Beach. In the direct vicinity of the hotel, you will find a large variety of restaurants, bars and shops, while still enjoying the tranquility inside the hotel. It only takes 10 minutes by subway to reach BEXCO.

**Info & bookings:** <https://zurl.co/sr6Y>

## 4 SHILLA STAY HOTEL Haeundae 4 \*

Shilla Stay Hotel Haeundae is a modern and stylish hotel located in the bustling Haeundae district of Busan, South Korea. With its prime location just a few steps away from the Haeundae Beach and other popular attractions, the hotel offers guests comfortable accommodation, excellent dining options, and convenient access to the city's highlights. \*The Standard room types are City View only.

**Info & booking:** <https://zurl.co/BLxo>

## QUICK FACTS

### Accommodation

Informations about selected Hotels in [Busan](#) please see page 37.

### CIMAC

CIMAC is the non-commercial sponsor of the 30th CIMAC World Congress in Busan. For further informations on CIMAC please visit the website at <http://www.cimac.com/>

### Cancellation of Congress Participation

In case of cancellation, provided that VDMA Services has received written notice about it 40 days before the congress, the participation fee will be refunded less a handling fee of € 180. In case of cancellation after this date, no refund will be made.

### CIMAC Membership

If you are uncertain about your membership status or want to apply for a membership, please contact the CIMAC Central Secretariat – [info@cimac.com](mailto:info@cimac.com)

### Congress Catering

Catering stations will be integrated in the exhibition area. During the coffee breaks and lunch break participants will be provided with food and drinks. Enjoy regional and international cuisine!

### Congress Documents

Please bring your mobile ticket ready on your mobile phone or tablet with you or print out your e-ticket legibly on a sheet of paper. Your personal badge is your entrance ticket to all sessions, the exhibition and the social events. Please, remember to wear your badge at the congress and the social events at every time. Congress bags will be provided in the registration area in the Convention Centre.

### Contact for Questions

For questions regarding the technical Program, please contact CIMAC Central Secretariat. For questions regarding the congress, sponsoring and exhibition, please contact the Main and the Co-Organizer of the congress. Contact details see page 43.

### COVID-19

Current COVID-19 regulations will be announced on our website <https://www.cimaccongress.com/> in time before the Congress.

### Cloakroom

Participants may leave their belongings in the designated area.

### Language

The official language of the Congress is English. No translation will be provided.

### Newsletter

For the subscription of the CIMAC Newsletter please fill out the form on CIMAC website: <http://www.cimac.com/publication-press/newsletter-subscription/index.html>

## QUICK FACTS

### Mobile App

A mobile app will be available for downloading in [Google Play](#) and [Apple App Store](#) around mid april. Visit [www.cimaccongress.com](http://www.cimaccongress.com) to find the download links once it is available.

### Optional Tours

For participating in the optional tours, please visit our hospitality room at the congress. Please see pages 19.

### Social Media

Fans and followers will find the CIMAC Congress on [LinkedIn](#) and [Twitter](#).

### Speakers' Preparation Room

All presentations can be checked and delivered to the speaker's preparation room 206 at least 2 hours prior to speaker's session. Presentations being held during a morning session should be checked at the end of the day before. Speakers are kindly requested to follow the instructions of the chairperson and strictly keep to the time of their presentation.

### Technical Program

Admission to all sessions of the technical Program is only possible with a valid congress ticket. The congress ticket for **CIMAC members, non members, speakers and students** includes: congress badge, congress bag, admission to all sessions and the exhibition, coffee breaks and lunches, Opening Ceremony, Welcome Reception, Accelleron Evening, Gala Dinner (except students).

The registration for **accompanying persons** includes: admission to the exhibition, coffee breaks and lunch, Opening Ceremony, Welcome Reception, Accelleron Evening, Gala Dinner.

### Technical Tours

Separate registration is required for participation in the technical tours. Registration is available via the congress website.

### Ticketshop

Tickets are only sold online via our Ticketshop and only payable via credit card. Print your ticket or bring it along on your mobile device.

### WIFI

Free WIFI is available at Busan Convention Center BEXCO. Login and password will be announced on-site.

## Main Organizer Congress:

### VDMA Services GmbH

a VDMA group company

Lyoner Straße 18  
60528 Frankfurt am Main  
Germany

Contact: Hatice Altintas  
Email: [Hatice.Altintas@vdma.org](mailto:Hatice.Altintas@vdma.org)

Phone: +49 69 6603-1143  
Fax: +49 69 6603-2843  
Email: [Hatice.Altintas@vdma.org](mailto:Hatice.Altintas@vdma.org)

# ABOUT CIMAC

Originally founded in Paris in 1951, CIMAC has become the **leading global association of the large internal combustion machinery industry**. It is a non-profit association bringing together and representing the large engine industry to regulators and standardizing bodies. In addition to promoting the work of National Member Associations, CIMAC supports information exchange and understanding across the large engine industry including:

- Builders of large diesel, gas and dual-fuel engines
- Users of large engines such as owners and operators of ships, power plants, locomotives etc.
- Systems and component suppliers
- Fuel and lubricant suppliers, including oil companies
- Classification societies and other regulatory bodies
- Academic institutions, consultant engineers, scientists
- System Integrators, shipyards and other service providers

## CIMAC's Vision:

To promote large engine technology power solutions that are efficient, reliable, safe and sustainable and of benefit to society, in pursuit of the transition to a low-carbon future.

## CIMAC's Mission:

To add value to our members' businesses and to society by:

- › Enabling exchange on technological trends and developments among our members, with their users, associated industries along the value chain.
- › Developing and promoting globally harmonized standards and regulations that foster a competitive, safe and sustainable industry.
- › Striving for zero environmental impact of power solutions utilizing large engine technology.
- › Facilitating safe and efficient operation, leveraging digitalization, automation and system integration.
- › Promoting open markets to foster the spread and scalability of innovative large engine technology solutions.

## CIMAC Membership

CIMAC members currently come from **24 countries** across America, Asia and Europe. Membership can take three forms:

- Membership of the official CIMAC National Member Association (NMA) in your country
- Membership in the respective National Member Associations (NMA)
- Corporate Membership for individual companies (in countries where there is no NMA)

Please see page [43](#) for CIMAC contact details.

# ABOUT CIMAC

## CIMAC Strategy Groups & Working Groups: The Consensus Seekers

CIMAC Strategy & Working Groups are the heart of CIMAC. Led by **international specialists** from CIMAC member organisations, they seek solutions to industry-wide technical issues and develop strategies to deal with pressing topics of the industry.

They interface with legislators, standards organisations, and regulators such as the classification societies to develop united CIMAC guidelines, recommendations, or positions, representing the industry on a pre-competitive, pre-legislative basis. They have a distinguished record of issuing guidance and publications on a wide range of crucial subjects relating to the operation of large engines in the maritime industry. Consequently, CIMAC Strategy & Working Group activities encompass the environmental compatibility, efficiency and safety of large engines and their applications.

### The two recently established CIMAC Strategy Groups are:

- Greenhouse Gas Strategy Group
- Digitalization Strategy Group

### CIMAC Working Groups currently cover these vital areas of engine technology and operation:

- |                             |                                  |
|-----------------------------|----------------------------------|
| ▪ Classification            | ▪ Electronics & Software Systems |
| ▪ Crankshaft Rules          | ▪ Gas Engines                    |
| ▪ Exhaust Emissions Control | ▪ Inland Waterway Vessels        |
| ▪ Fuels                     | ▪ System Integration             |
| ▪ Marine Lubricants         | ▪ Propulsion                     |
| ▪ Users                     |                                  |

## CIMAC Events

The CIMAC Congress represents the culmination of all CIMAC activities, being held every three years, each time in a different member country. The Congress is **a unique gathering of key industry decision makers**, including manufacturers of engines, components and sub-systems, engine owners and operators, classification societies, researchers and developers, and representatives from regulatory bodies.

The Congress program centres on the **presentation of technical papers** on engine research & development, application engineering on the original equipment side, and engine operation and maintenance on the end-user side. This is complemented by social programs which promotes friendship and networking within the community.

CIMAC Circles are panel discussions involving CIMAC members debating topical issues. They are hosted at key industry events around the world at least once a year. CIMAC CASCADES promote the advancement of young engineers and their careers. The events enable them to meet with leading industry experts to exchange information, network and present their projects.

CIMAC Tech-Talks and Webinars are new online events with technical presentations & live discussion sessions, chaired by distinguished experts from the industry, offering fresh insights into new and important topics pertaining to the industry today.

# CONGRESS TECHNICAL PROGRAM COMMITTEE

Person	Company	Place
Aabo, Kjeld	MAN Energy Solutions	Copenhagen, Denmark
Aufischer, Rainer	MIBA Gleitlager GmbH	Laakirchen, Austria
Banck, Andreas	Caterpillar Motoren GmbH & Co. KG	Kiel, Germany
Bergmann, Dirk	Accelleron, Turbo Systems Switzerland Ltd.	Baden, Switzerland
Boletis, Elias	Wärtsilä	Vaasa, Finland
Boom, Rick	Woodward	Amsterdam, Netherlands
Buchholz, Bert	University of Rostock	Rostock, Germany
Chatterjee, Daniel	Rolls-Royce Power Systems	Friedrichshafen, Germany
Coppo, Marco	OMT	Torino, Italy
Engelmayer, Michael	LEC GmbH	Graz, Austria
Feng, Wang	SMDERI	Shanghai, China

Performance you can rely on.

**INFINEUM SOLUTIONS ENGINEERED FOR MAN B&W TWO-STROKE ENGINES MEETING MAN ES CATEGORY II**

Two options available to you:

**Infineum M8040** or **Infineum M7095 + Infineum M7110 Booster Additive Package**

Infineum's proprietary additive technology is proven to deliver higher efficiencies as a single oil for engines running on Very Low or Zero sulphur fuels, supporting your transition to future fuel alternatives. Being MAN ES 40BN CAT II-approved, our two cutting-edge additive packages with tangible performance benefits like optimised lubes consumption and reduced emissions will speed up your decarbonization journey. **Infineum – your preferred solution to a sustainable future.**
